

Accounting Bridge Module
Simplifying your accounting processes

Exporting transaction data from Milano and importing it into your Accounting Software

Email Exported Data

Have an Accountant that takes care of your financial books? E-mail your accountant the Accounting Bridge data file directly from within the Accounting Bridge module.

Import/Export Function

When you run the Accounting Bridge all you need to do is click on the Export button to create the compatible Accounting Software file; which can then be imported into your Accounting Software.

\$ Saving Time & Money

You no longer have to manually enter your transactional based data into your Accounting Software. The Accounting Bridge does it for you with a few clicks of the mouse.

General Ledger Account Setup

Run the Link Wizard and simply enter your General Ledger account numbers into the Account fields.

EXPORTED DATA FROM MILANO

The Accounting Bridge exports transactional based data from Milano including the following...

✓ Sales Data

Including all Service, Retail, Gift Card, and Series sales.

✓ Tax Totals

All of Taxes Collected will be captured.

✓ Payment Types

Each Payment Type will have their totals exported.

✓ Petty Cash

All of your recorded petty cash expenses will be exported.

✓ Categories

Optional setting to breakdown your sales revenue by Service and Retail Category.
